## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see Remarks (page 9, first paragraph), filed 10/18/2004, with respect to claims 1-20 have been fully considered and are persuasive. The rejection of claims 1-20 has been withdrawn.

2. Claims 1-20 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The present invention provides a new method, apparatus and storage medium for coding first information according to second information, wherein information is embedded into data without deterioration on decoded data and without increasing in data amount (specification, page1, first paragraph).

Particularly, the new method, apparatus and storage medium comprise the following features, which the prior art taken either singly or in combination does not teach:

- embedding second information into first information to produce coded data so that decoding the coded data is performed by utilizing an energy distribution possessed by the first information (see independent claims 1, 5, 11, 16, and 17);

- the coded data having the second information embedded into the first information and decoding the coded data into first information and second information by utilizing an energy distribution possessed by the first information (see independent claims 6 and 10).

Art Unit: 2624

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
